

Whereas:

- Second-hand smoke is the third leading cause of preventable death in this country, killing approximately 65,000 nonsmokers in the U.S. each year.
- Second-hand smoke contains over 4,000 chemicals, including 69 that cause cancer.
- Second-hand smoke is proven to aggravate asthma and increase the risk of cardiovascular diseases in children and adults.

We, the undersigned, assert that:

- We have the right to breathe clean, smoke free indoor air and that to protect the health of our community, Champaign-Urbana, workplaces, including restaurants and bars, must be smoke free.
